Love Your Trees

The beauty and desirability of Girard Estate depends in part on its reputation as a green and shady haven from the harsh noise and heat of the city. Our 100-year old trees provide that haven and improve our property values. If a tree is dying, call the city at 215-685-4362 for an arborist to evaluate it, remove it if necessary, and replace it. A permit is required to remove street trees. GENA urges any of its members who see a tree cutting operation on their street to call the city immediately to determine that a proper permit has been pulled, and to note and report the name of the contractor involved. If the operation is happening on a weekend, it is very likely illegal and you should call 911.
